

## Portland State Aerospace Society

Spaceflights cannot be stopped. This is not the work of any one man or even a group of men. It is a historical process which mankind is carrying out in accordance with the natural laws of human development.

The path of a cosmonaut is not an easy, triumphant march to glory. You have to get to know the meaning not just of joy but also of grief, before being allowed in the spacecraft cabin.

The sky is the limit only for those who aren't afraid to fly!

The regret on our side is, they used to say years ago, we are reading about you in science class. Now they say, we are reading about you in history class.

Buy why, some say, the moon? Why choose this as our goal? And they may as well ask why climb the highest mountain?

That's one small step for [a] man, one giant leap for mankind.

Science cuts two ways, of course; its products can be used for both good and evil. But there's no turning back from science. The early warnings about technological dangers also come from science.

Space, the final frontier. These are the voyages of the Starship Enterprise. Its five-year mission: to explore strange new worlds, to seek out new life and new civilizations, to boldly go where no man has gone before.
