

## Portland State Aerospace Society

Curious that we spend more time congratulating people who have succeeded than encouraging people who have not.

Across the sea of space, the stars are other suns.

We choose to go to the moon in this decade and do the other things, not because they are easy, but because they are hard, because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one which we intend to win.

I don't know what you could say about a day in which you have seen four beautiful sunsets.

As I stand out here in the wonders of the unknown at Hadley, I sort of realize there's a fundamental truth to our nature, Man must explore . . . and this is exploration at its greatest.

The sky is the limit only for those who aren't afraid to fly!

We want to explore. We're curious people. Look back over history, people have put their lives at stake to go out and explore ... We believe in what we're doing. Now it's time to go.

Dinosaurs are extinct today because they lacked opposable thumbs and the brainpower to build a space program.

We are all connected; To each other, biologically. To the earth, chemically. To the rest of the universe atomically.

You know, being a test pilot isn't always the healthiest business in the world.
